

Shooting range information

Orientation of the range: shooting from South to North.

The area behind and before the targets will be cleared from vegetation so the impact of shots missing the target will be visible. The distance between targets will be 3 m. Targets will be marked with large enough numbers in white, black and red to ease quick identification.

The shooting range is situated between Várpalota and Veszprém, and 90-minute drive from Budapest.

Preliminary competition program
